(Caveat lector: published versions of the following may contain some changes.)

2. The first order properties of products of algebraic systems (with R. L. Vaught), *Fundamenta Mathematicae* 47 (1959), 57-103.
12. Two notes on abstract model theory. II. Languages for which the set of valid sentences is semi-invariantly implicitly definable, *Fundamenta Mathematicae* 89 (1975) 111-130.
18. **Choice principles, the bar rule, and autonomously iterated comprehension schemes in analysis** (with G. Jäger), *J. Symbolic Logic* 48 (1983), 63-70.

43. Three conceptual problems that bug me, Unpublished lecture text for 7th Scandinavian Logic Symposium, Uppsala, 1996.

45. The significance of Hermann Weyl's Das Kontinuum, ibid., 179-194.

46. Relationships between Constructive, Predicative and Classical Systems of Analysis, ibid., 221-236.

48. Ah, Chu, in JFAK. Essays Dedicated to Johan van Benthem on the Occasion of his Fiftieth Birthday, Amsterdam Univ. Press, Amsterdam (1999), CD-ROM only.

55. **Notes on Operational Set Theory I. Generalization of "small" large cardinals in classical and admissible set theory**, draft (Theorem 4(i), p. 5, needs correction).

58. **Some formal systems for the unlimited theory of functors and categories.** Unpublished MS from 1972-73 referred to in the preceding paper, sec. 8. Uneven scanning has resulted in some missing symbols that can be restored according to context, including: p. 18, l. 6, S*; p.19, Theorem 3.1, S*, and p.26, l.3, a epsilon* b.

60. **Comments on "Predicativity as a philosophical position" by G. Hellman,** *Review Internationale de Philosophie* (special issue, Russell en héritage. Le centenaire des *Principles*, Ph. de Rouilhan, ed.) 229 (no. 3, 2004), 313-323.

70. **Lieber Herr Bernays! Lieber Herr Gödel! Gödel on finitism, constructivity and Hilbert's program**, preprint of the preceding in *Dialectica* 62 (2008), 179-203. (With some editorial differences.)

72. **Harmonious logic: Craig's interpolation theorem and its descendants**, *Synthese* 164, no. 3 (2008), 341-357.

73. **Axioms for determinateness and truth**, *The Review of Symbolic Logic*, 1 no. 2 (2008), 204-217.

77. **Conceptual structuralism and the continuum**, slides for talk Phil Math Intersem 2010 Université Paris 7-Diderot, 6/08/10 (revision of slides for talk at VIIIth International Ontology Congress, San Sebastián, 10/01/08).

83. **Operational set theory and small large cardinals**, *Information and Computation* 207 (2009), 971-979.
92. **About and around computing over the reals**, in *Computability: Gödel, Church, Turing and Beyond* (J. Copeland, C. Posy and O. Shagrir, eds), MIT Press (2013), 55-76.
93. **Which quantifiers are logical?: A combined semantical and inferential criterion**, slides for talk Aug 08, 2011, ESSLLI Workshop on Logical Constants, Ljubljana.
95. **Is the Continuum Hypothesis a definite mathematical problem?**, Draft of paper for the lecture to the Philosophy Dept., Harvard University, Oct. 5, 2011 in the EFI project series.
96. **Is the Continuum Hypothesis a definite mathematical problem?**, slides for the preceding talk.
98. **About and around computing over the reals**, slides for Logic Seminar talk, Stanford, April 17, 2012.
99. **And so on... Reasoning with infinite diagrams**, *Synthese* 186, no. 1 (2012), 371-386.
102. **Introduction to Foundations of Explicit Mathematics** (book in progress by S. Feferman, G. Jäger, S.Strahm, with the assistnace of U. Buchholtz), draft 7/19/12.
108. **Why isn't the Continuum Problem on the Millennium ($1,000,000) Prize list?**, slides for CSLI Workshop on Logic, Rationality and Intelligent Interaction, Stanford, June 1, 2013.
111. **Categoricity and open-ended axiom systems**, lecture slides for the conference, "Intuition and Reason", in honor of Charles Parsons, Tel-Aviv, Dec. 2, 2013; full YouTube video.
115.  The Continuum Hypothesis is neither a definite mathematical problem nor a definite logical problem, revised version of 2011 Harvard Philos. Dept. EFI lecture.

118.  Indescribable cardinals and admissible analogues, notes for lecture for 2013 meeting in honor of Gerhard Jäger's 60th birthday.

119.  Many sorted model theory as a conceptual framework for Systems Biology, Draft of keynote lecture for AMS/ASL session on applications of logic and model theory to SB, Seattle, 1/09/16.

120.  Many sorted model theory as a conceptual framework for Systems Biology, (slides, ibid.)
